2. Introduction AJO B2B Edition

Adobe Journey Optimizer B2B Edition is designed to help organizations orchestrate meaningful, data-driven engagement across complex buying groups. In today's B2B landscape, where multiple stakeholders influence purchasing decisions, marketers must move beyond isolated campaigns and instead deliver coordinated, personalized experiences that reflect both account-level and individual-level intent. This hands-on lab is built to immerse you in that approach, combining practical exercises with AI-powered capabilities to demonstrate how modern B2B journey orchestration works in real time.

Throughout this lab, you will **gain experience building both account journeys and person journeys**, learning how to align engagement strategies across an entire buying group while still tailoring interactions to individual roles and behaviors. You will also **explore how AI agents can accelerate key workflows**, including audience creation and journey design, enabling faster time-to-value and more adaptive campaign execution.

In addition, the lab emphasizes the importance of continuous insight and optimization. You will **learn how to quickly analyze account activity, interpret engagement signals, and assess buying group completeness**. By evaluating intent and solution interest, you'll be able to identify gaps, prioritize outreach, and refine your strategies to better support progression through the buying cycle.

By the end of this lab, you will have a practical understanding of how to leverage Adobe Journey Optimizer B2B Edition to create coordinated, insight-driven experiences that drive deeper engagement and more effective account-based marketing outcomes.

AI is probabilistic, not deterministic.

Your prompt results may not be exactly like what appears in this workbook or the lab presenter's screen. AI agents don't give identical outputs every time—think of them like smart strategists, not calculators. They factor in context (like prior inputs or data), interpret intent slightly differently, and generate responses probabilistically. Just like two marketers given the same brief, you may get variations in ideas, emphasis, and execution.

2.1. Account Audience Discovery

In this exercise we'll learn to use Audience Agent to find and scale audiences. We'll be leveraging product intent signals to infer which personas we should be targeting based on their propensity to engage and activate. Audience Agent will analyze structured and unstructured data, ranging from customer and account profiles to the activities that both entities generate as well as related opportunities, to dial in our focus.

Use Audience Agent

Audience Agent Prompt 1

How many accounts are showing product intent for ControlEdge?

Audience Agent Prompt 2

What are the top industries for those accounts showing product intent for ControlEdge?

Audience Agent Prompt 3

For each industry, count accounts with high intent for product ControlEdge.

Audience Agent Prompt 4

How many accounts in the Oil & Gas, Food Manufacturing, or Logistics & Supply Chain industries have an open opportunity with ControlEdge in the name of the opportunity?

Audience Agent Prompt 5

For opportunities that have "ControlEdge" in the name of the opportunity, and where the account industry is Oil & Gas, Logistics & Supply Chain or Food Manufacturing, what are the most common job titles for people associated with those opportunities?

Audience Agent Prompt 6

For the group above, please break out the most common job titles in that group per industry (top job titles for Pharmaceutical Manufacturing, top for Oil & Gas, top for Logistics & Supply Chain).

Practical Application

Our Chief Commercial Officer has just told us that they expect ControlEdge to cross-sell well with prospects or customers interested in our SmartSense Industrial Sensors as the two together enhance the robustness of each solution.

How many accounts are showing product intent for SmartSense?

For each industry, count accounts with high product intent for SmartSense.

For each industry, count accounts with high product intent for ControlEdge and high product intent for SmartSense.

2.1.1. Buying Group Records

Summit Refining - Oil & Gas

High Intent

Riverton Processing - Food Manufacturing

Low Intent

2.2. Building Journeys

This section introduces the core concepts and hands-on process of building account journeys and person journeys in Adobe Journey Optimizer B2B Edition. As B2B marketing becomes increasingly complex, successful engagement requires orchestrating experiences that span both the entire account and the individuals within it. Understanding how these two journey types work together is key to delivering relevant, coordinated interactions across the buying group.

In the following exercises, you will learn how to design account journeys that guide engagement at the organizational level—helping you manage buying group progression, track solution interest, and drive alignment across stakeholders. At the same time, you will build person journeys that focus on individual roles, behaviors, and preferences, enabling more personalized and timely communications.

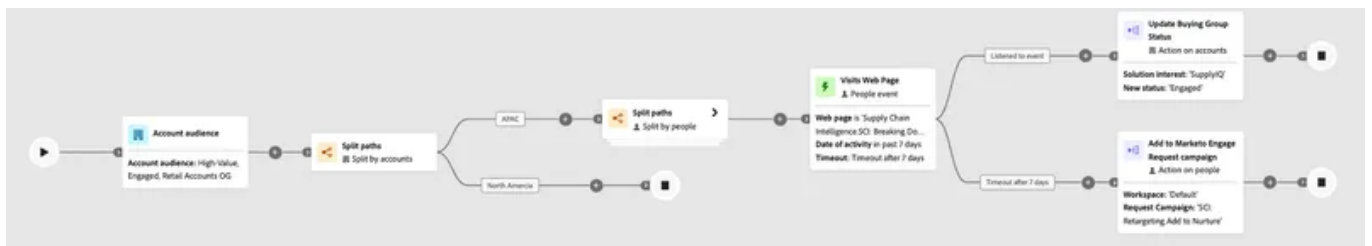

2.2.1. Account Journey Building

In this exercise we'll create an account journey targeting your High Value Retail accounts with a nurturing email campaign.

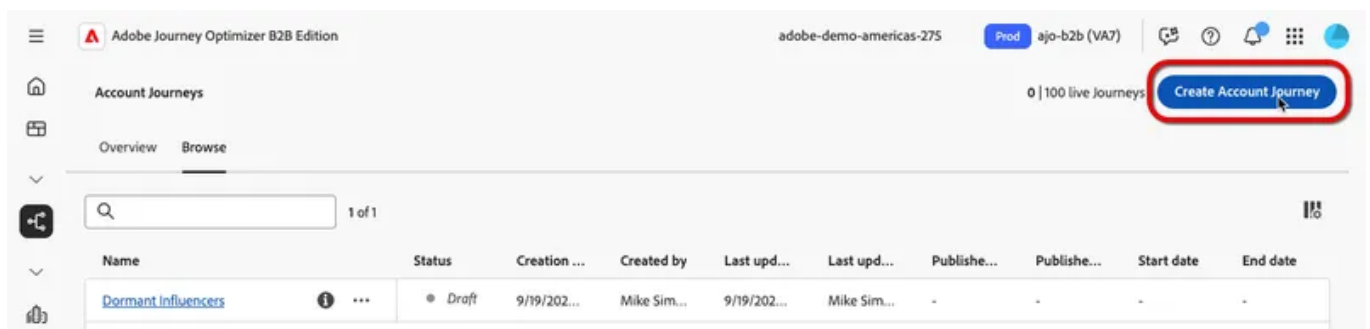

Our journey will:

- Regionalize communications based on the account location
- Personalize messaging and communication channel based on role within the buying group
- Listen for follow up activity on the website and update the buying group status accordingly

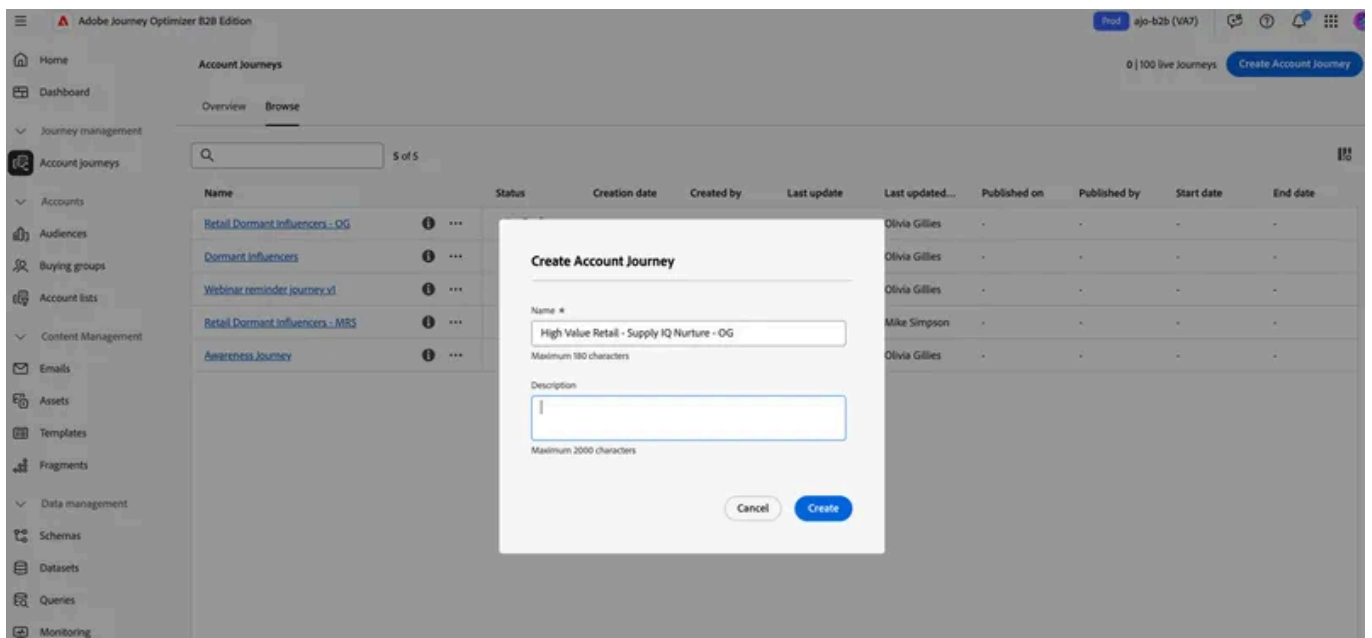

The final journey will look like this:

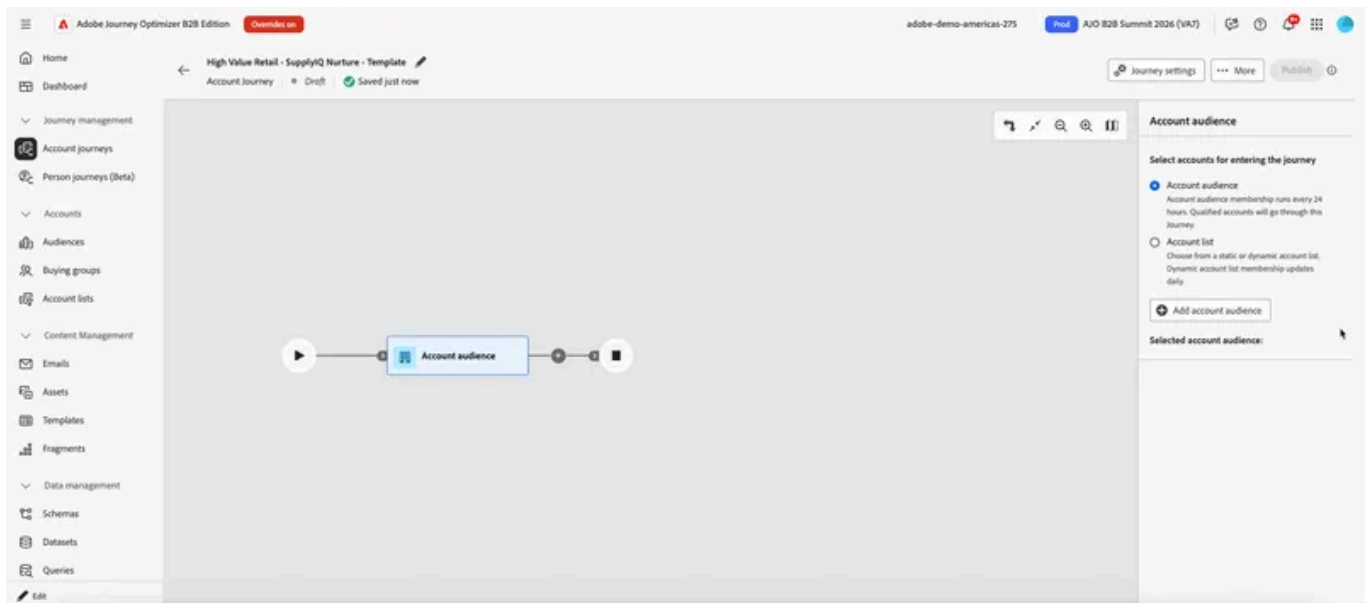

1. From the menu, select "**Account Journeys**" on the left navigation bar and click "**Create Account Journey**".

2. Name your journey "**High Value Retail - Supply IQ Nurture - <your initials>**" and click to **Create**

3. Select the **High-Value, Engage, Retail Accounts** audience to start the journey

4. Add a Split Paths node and select the **Account audience** radio button

5. Create two paths for different market regions

- HQ - North America
- HQ - APAC

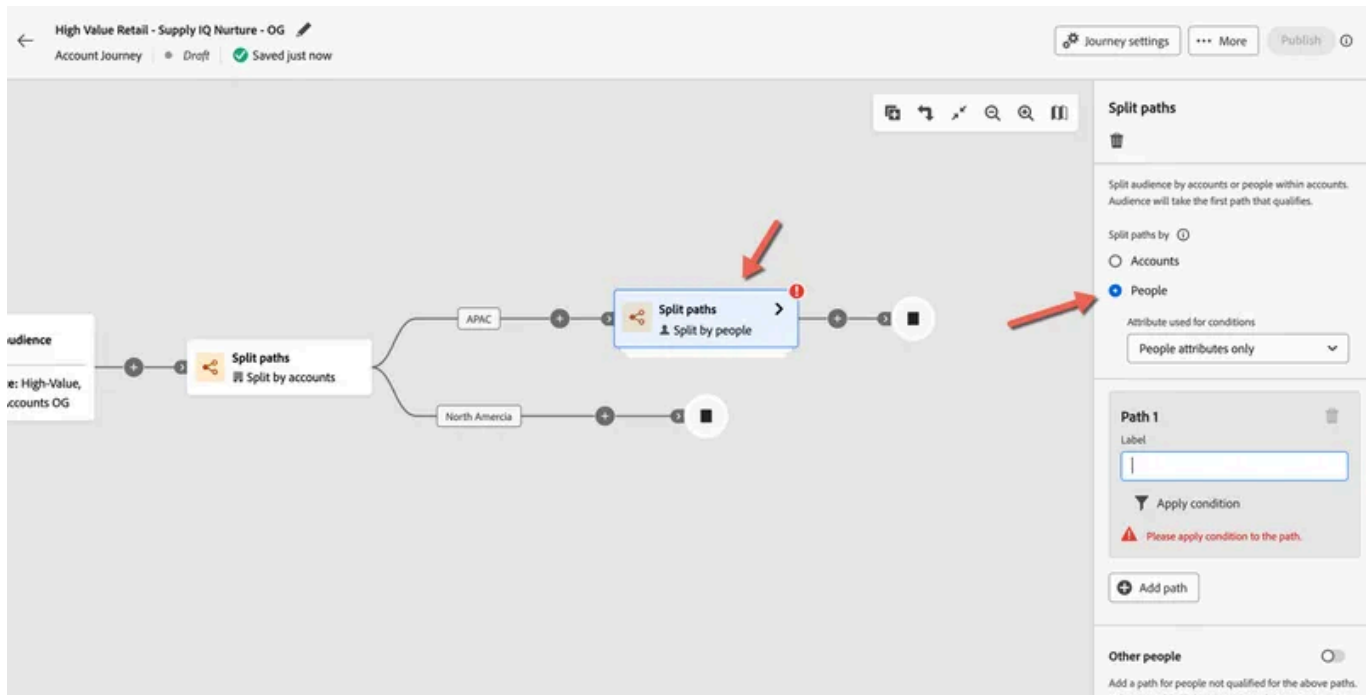

6. Add the filter Country to each path condition and add the following country codes to their corresponding region

- North America: USA, CA, MX
- APAC: JPN, CHN

The screenshot shows the 'Conditions for HQ - APAC' configuration window. The window has a 'Done' button in the top right. Below the title, it says 'Add filters that are applicable to each path'. On the left, there is a list of 'Account Filters' including 'Account Attributes', 'Account Phone Number', 'Address Postal Code', 'Address Region', 'Annual revenue', 'City', 'Country', 'Domain name', 'Employee size', 'Industry', 'Logo Url', and 'Name'. The 'Country' filter is highlighted with a red box. On the right, the 'Filter logic' is set to 'Apply all filters'. Below this, there is a section for '1 - Country' with a dropdown menu. The dropdown menu is open, showing 'Country' and 'is' with a dropdown arrow. Below the dropdown, there are two buttons: 'JPN' and 'CHN', both with a red box around them. A red arrow points from the 'Country' filter in the left list to the dropdown menu.

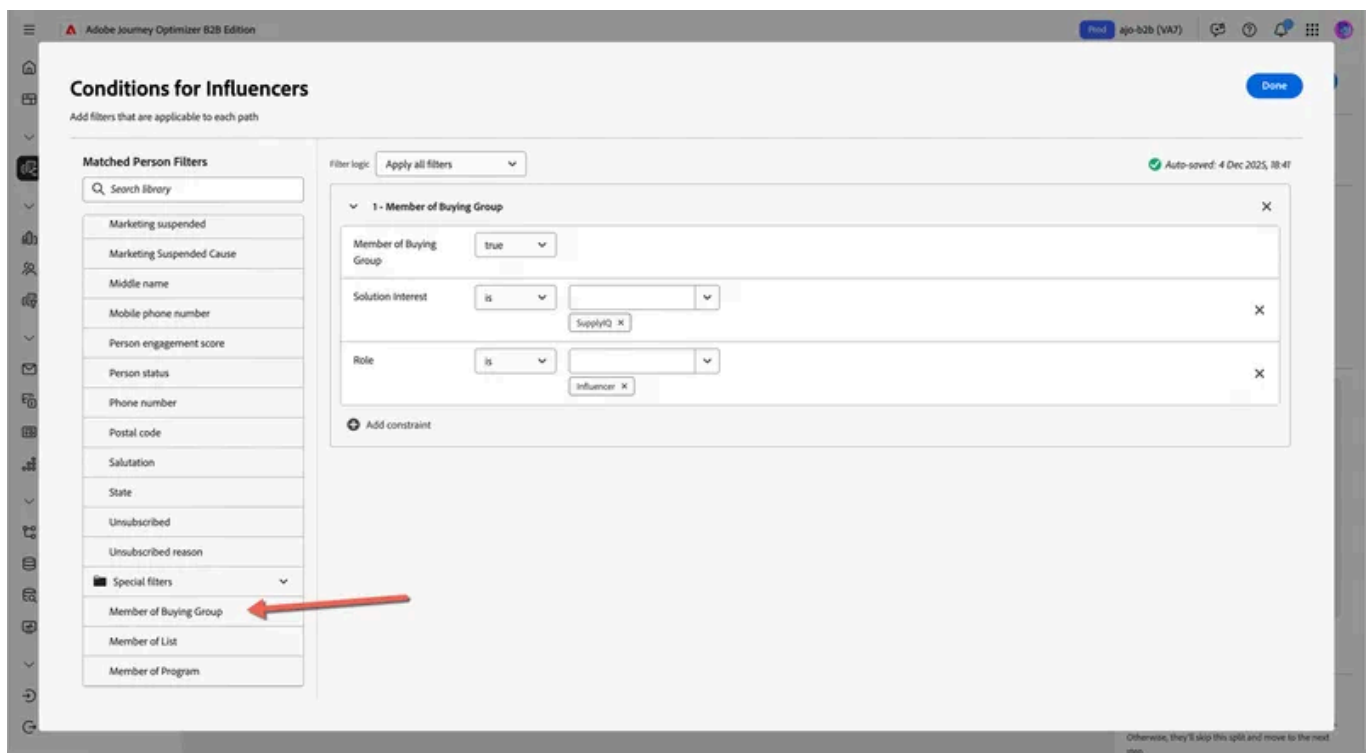

7. Split paths again for the North America branch and select the **People Audience** radio button.

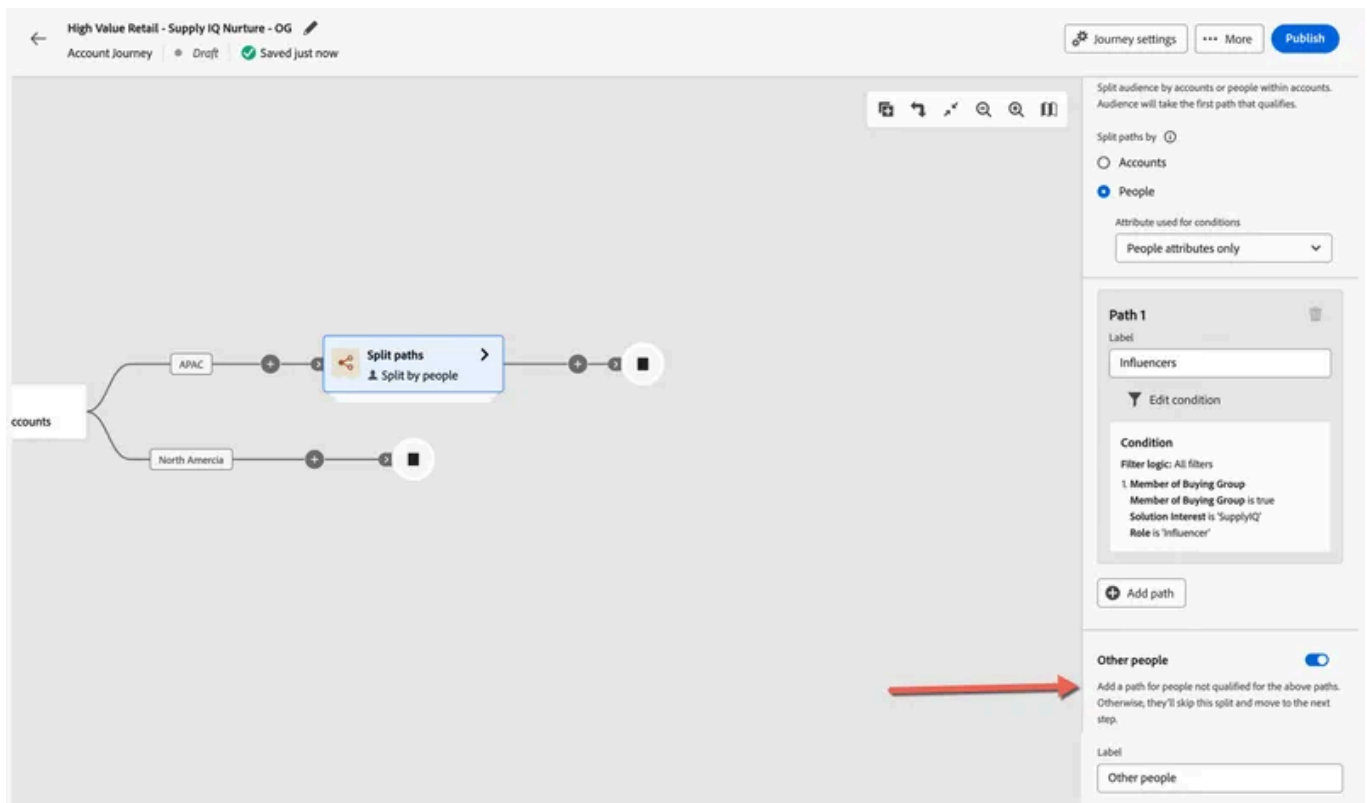

8. Name the first path **Influencers** and click **Apply condition** option.

Select the **Special Filter** condition **Member of Buying Group** and select:

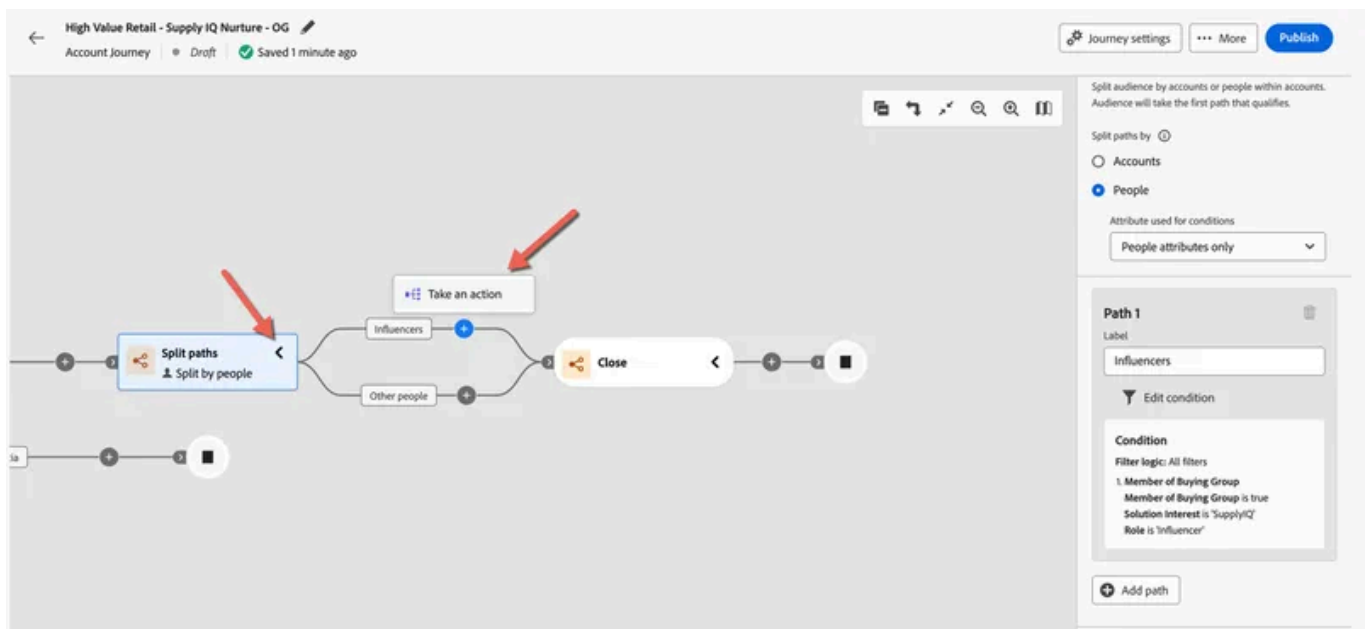

- Member of buying Group: **true**
- Solution Interest: **SupplyIQ**
- Role: **Influencer**

9. Flip the **Other people** toggle

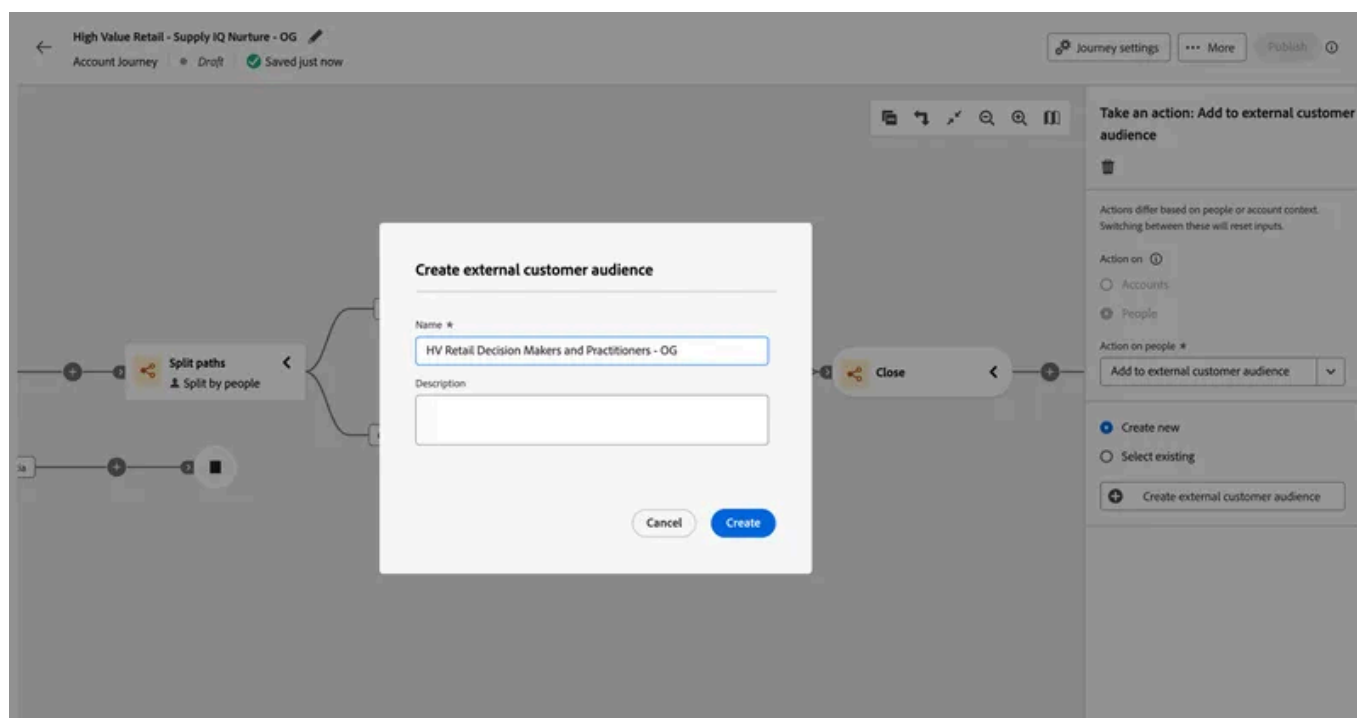

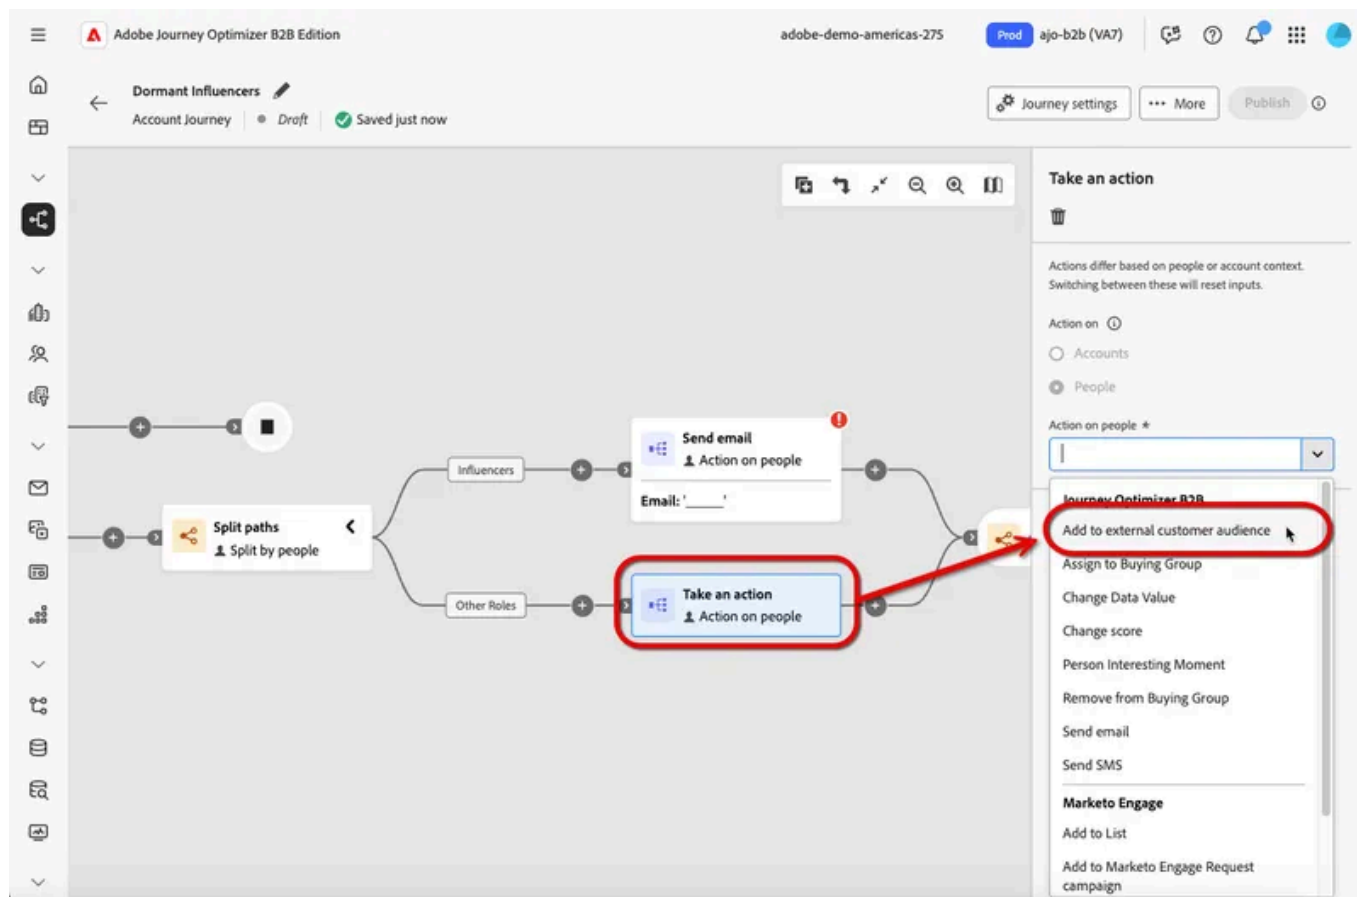

10. Open the split by clicking on the arrow and add a **Take an Action** node to the new **Influencers** path and the **Other Role** Path.

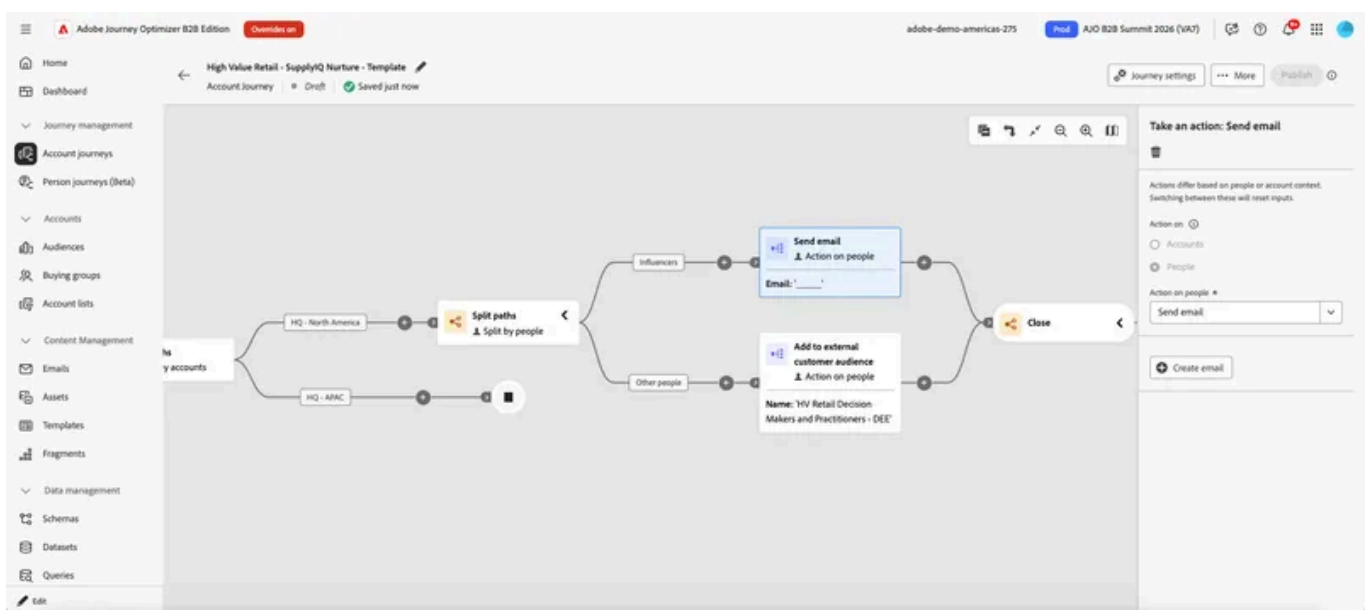

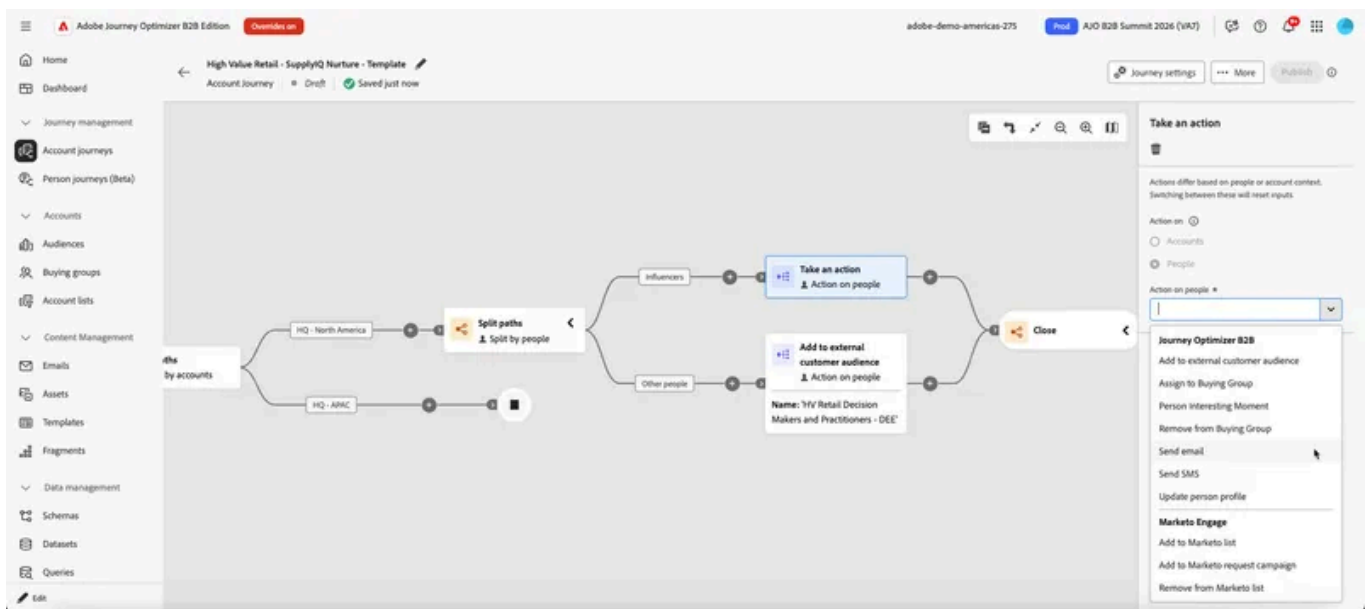

We're going to send the influencers a personalized email - but we'll send the other roles to an external customer audience for targeting on Paid and/or Social Media sites like LinkedIn.

11. Add an **Add to external customer audience** node to the **Other Role** path. Create a **new external audience** and name it **HV Retail Decision Makers and Practitioners** -

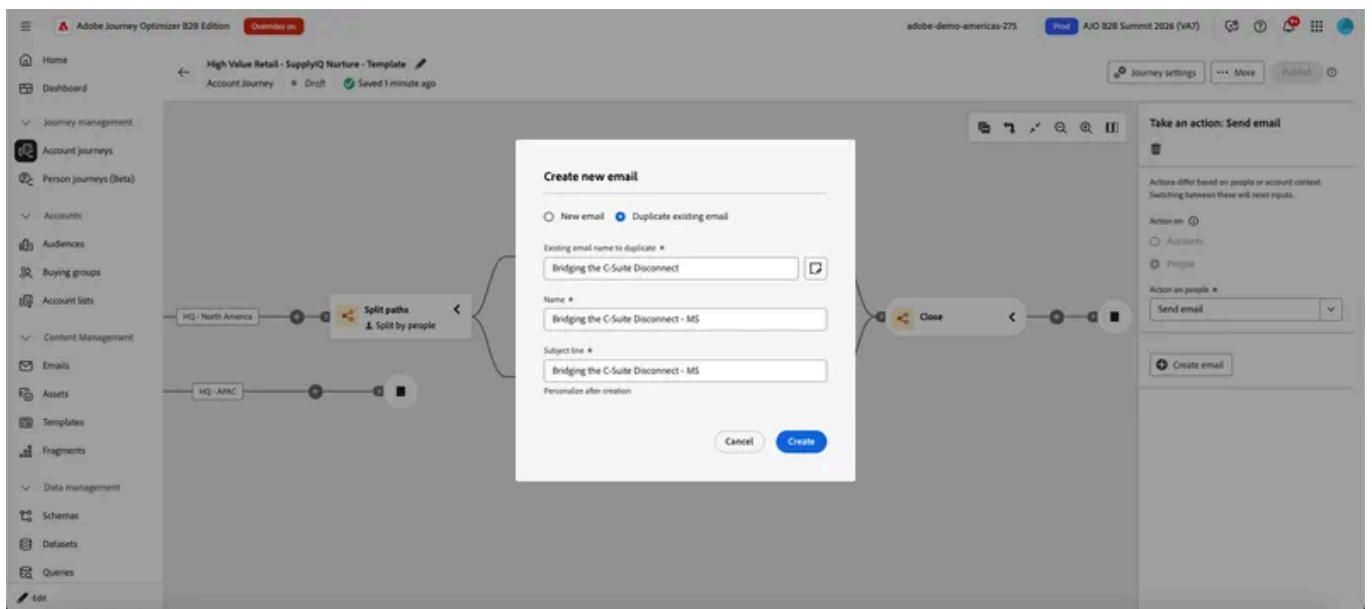

{your initials}.

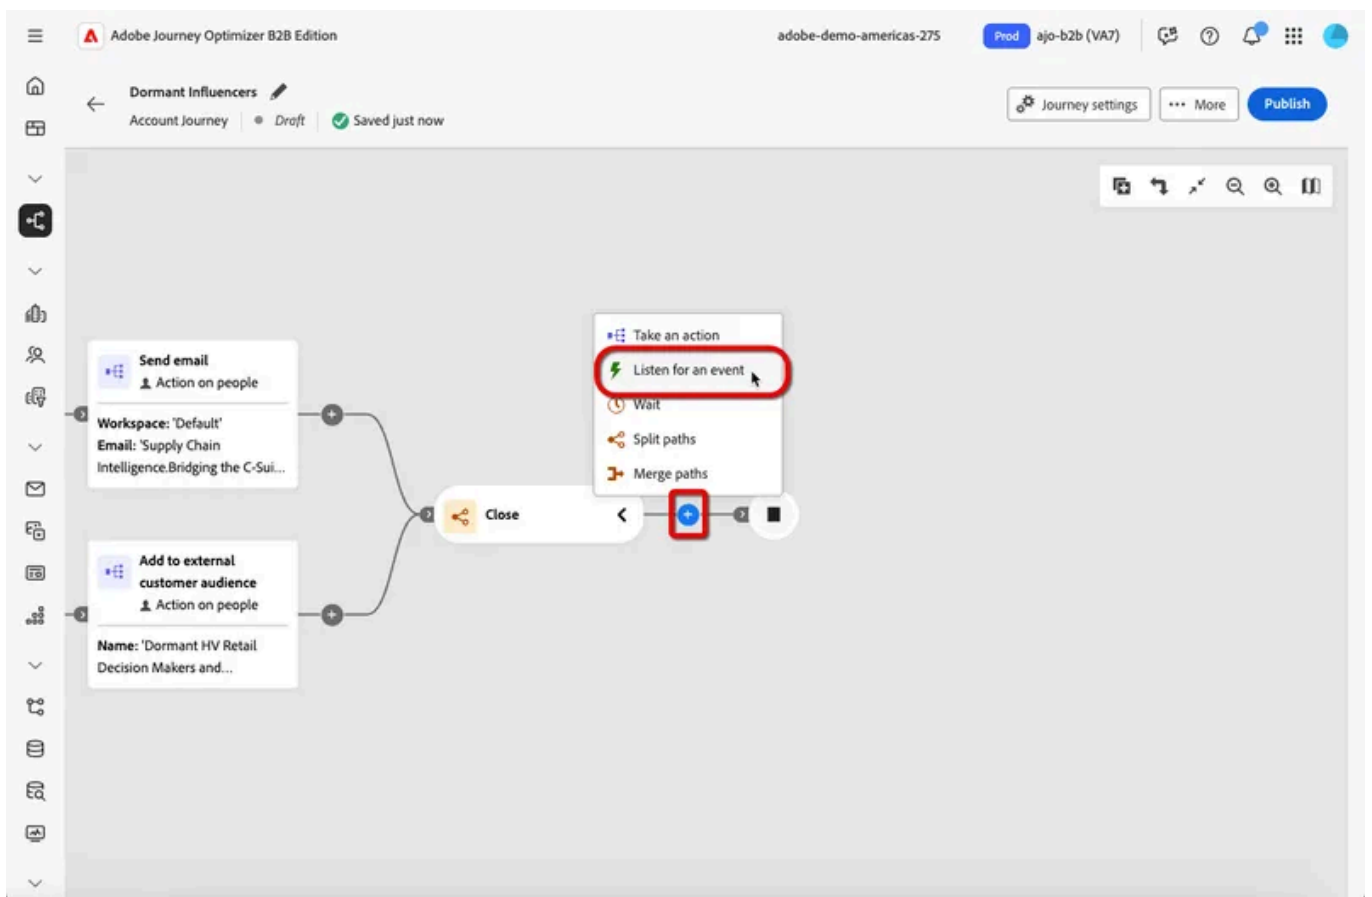

12. Return to the action for **Influencers** and select the **Send email** action

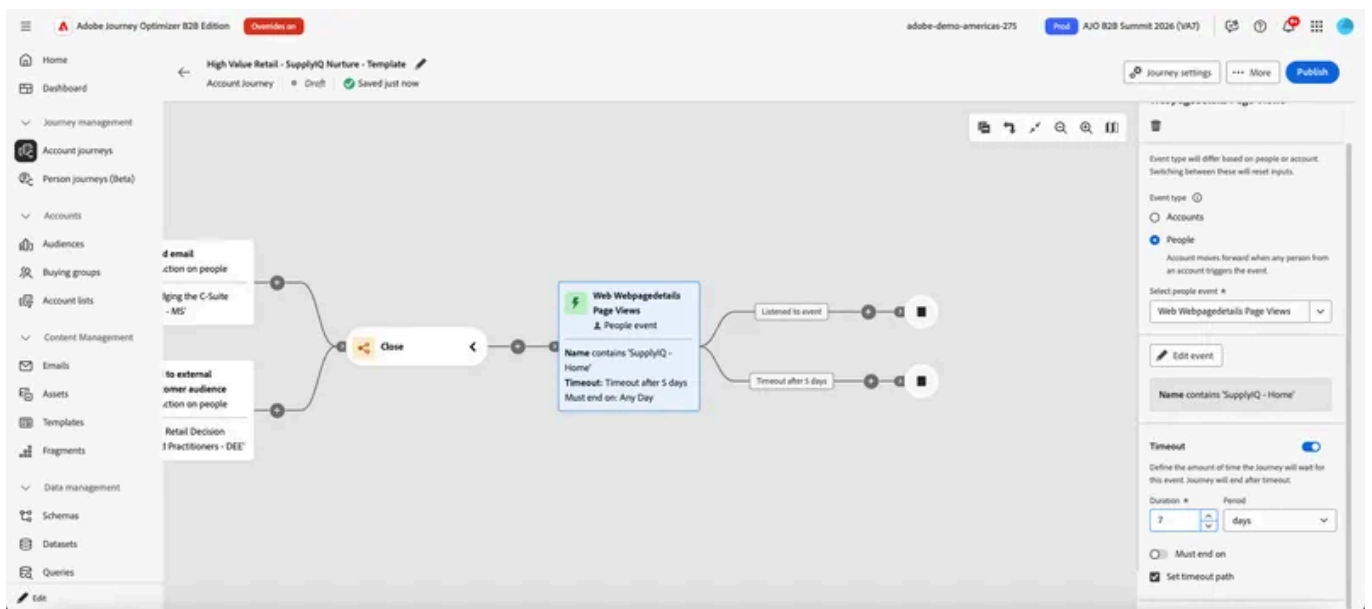

13. You can choose to create a new email or you can duplicate an existing Email. For now, duplicate existing email **Bridging the C-Suite Disconnect** and rename it **Bridging the C-Suite Disconnect - <your initials>**

14. Next we want to see who reacts to our email and if they visit our landing page or take specific actions we will promote the buying group to a new stage. Add the **Listen for an event** action to the merged path.

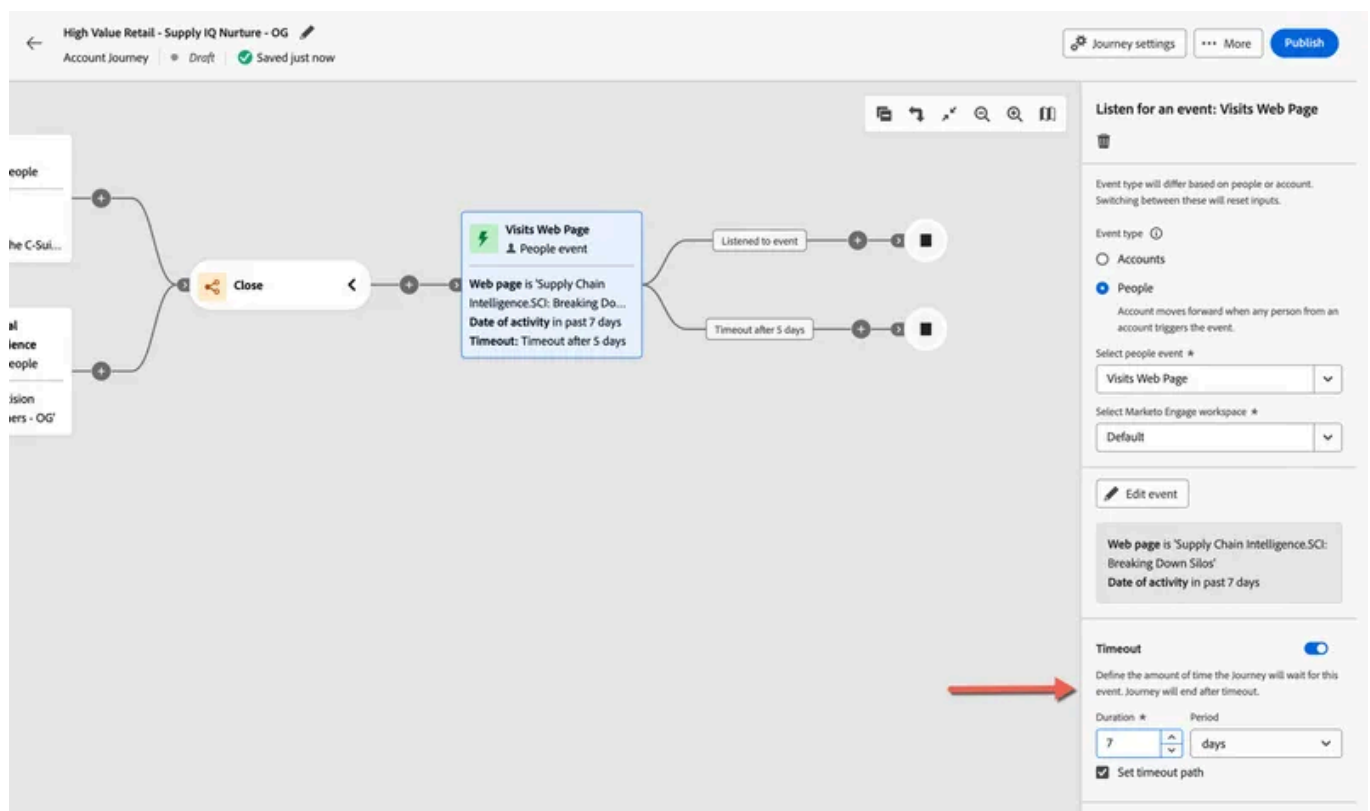

15. Select the **People** event type radio button and select the **Visits Web Page** event. Click the **Edit event** button.

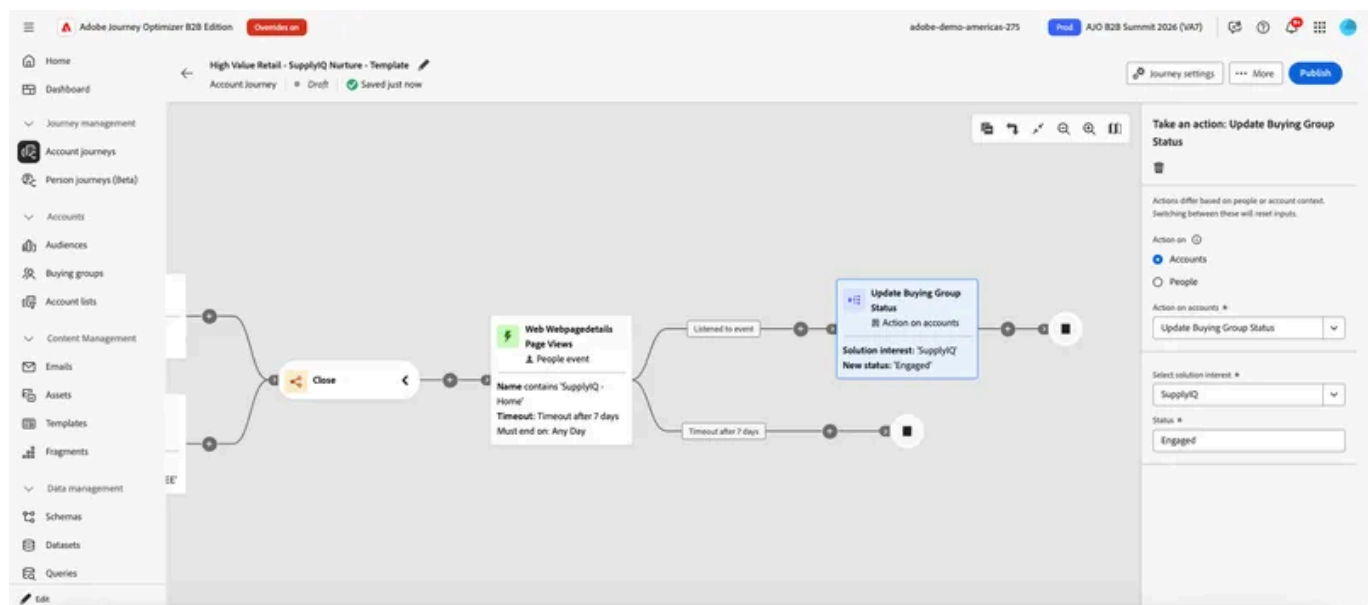

16. Select the **Name** constraint, change the operator to **contains**, and add **SupplyIQ - Home** as the web page name.

17. Add a **Timeout** of 7 days to our event

18. Add a **Take an Action** node to the **Listened to event** path. Select the **Account** radio button and select the **Update Buying Group Status** action from the dropdown. Select the **SupplyIQ** solution interest and enter the status **Engaged**.

19. Add a **Take an Action** node to the **Timeout** path. Select the **People** radio button, select the action **Add to external customer audience**, and select the **Select** existing radio button and choose the **Profiles that didn't react** audience from the list

2.2.2. Person Journey Building

In this exercise we'll create a person journey targeting people that have filled out a web form requesting more information about Engage360, a customer onboarding and success platform.

Goal: build the framework for a journey that incorporates multiple splits and activations based on buying group composition and customer preferences

Use Journey Agent

Journey Agent Prompt

Create a B2B person journey that starts with the **Request for Information audience**.

Split the journey into two paths based on **buying group completeness**.

The first path should filter for 100% completeness and the second path should be all other people. The others path should be open ended. The 100% complete path should split paths again by **buying group roles**. The roles are influencers and all other roles. The influencer path should listen for a **demo request event** and then either send an email if the customer's **preferred channel is email** or **request a Marketo campaign**. Add a timeout to the influencer path after demo request event.

Try It Yourself

There are many actions you can program into a person journey. Try using some of the actions below.

Complete the Person Journey Build

Start a Journey

Select a Profile audience or an Event audience

Take an Action

Action	Description
Add to external customer audience	Add a person to a Customer Audience that is used for activation outside of AJO B2B Edition (eg LinkedIn, Target)
Add to Marketo list	Add a person to an existing list in Marketo Engage
Add to Marketo request campaign	Add a person to an existing Marketo Engage campaign that is designed to activate from outside of Marketo via the Campaign is Requested Trigger
Person Interesting Moment	Create a customized, detailed event or comment that can be surfaced to sales team or other marketing staff via Marketo Sales Insights
Remove from Marketo list	Remove a person from an existing list in Marketo Engage
Send email	Send and email
Update person profile	Update a contact or lead profile profile

Listen for an Event

Event	Description
Person profile changes	Listen to changes made to specific attributes to a person's profile. Attributes are limited to those exposed to the journey builder.
Lead Operation Score Changed	Listen for a profile score change
Media downloaded content	Listen for a media download event
Demo Request	Listen for a demo request via form fill
Web Form Filled Out	Listen for a specific form fill event
Web Page View	Listen for a specific web page view event

Wait

Configuration	Description
Type	Duration or Date
Duration	A whole number representing minutes, hours, days, weeks or months.
Period	A period of time that is specified as minutes, hours, days, or months.
Must end on	A toggled configuration that allows the user to specify when a wait ends for individual profiles. (eg any profile stopped a wait step may progress after Tuesday at 8:00 AM. PDT.

Split Paths

Filter Type	Description
Custom Objects/Special Filters	Person has an account relationship or is a member of a specific buying group
Person Attributes	Attributes that pertain specifically to the person profile

3. Introduction to Marketo Engage

Welcome to the Adobe Marketo Engage Hands-on Lab!

We're excited to have you join us today as we dive into the capabilities of the new Marketo Engage UI. This session is designed to be interactive, giving you the opportunity to explore Marketo's features firsthand.

Our goal is to help you gain practical knowledge that you can apply to your business, from the new Email Designer to the enhanced Program and Campaign features! We encourage you to ask questions, participate in lab exercises, and make the most of this collaborative learning environment.

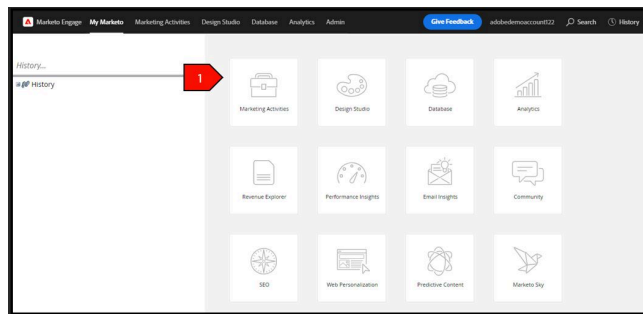

Let's get started!

3.1. Data Foundations

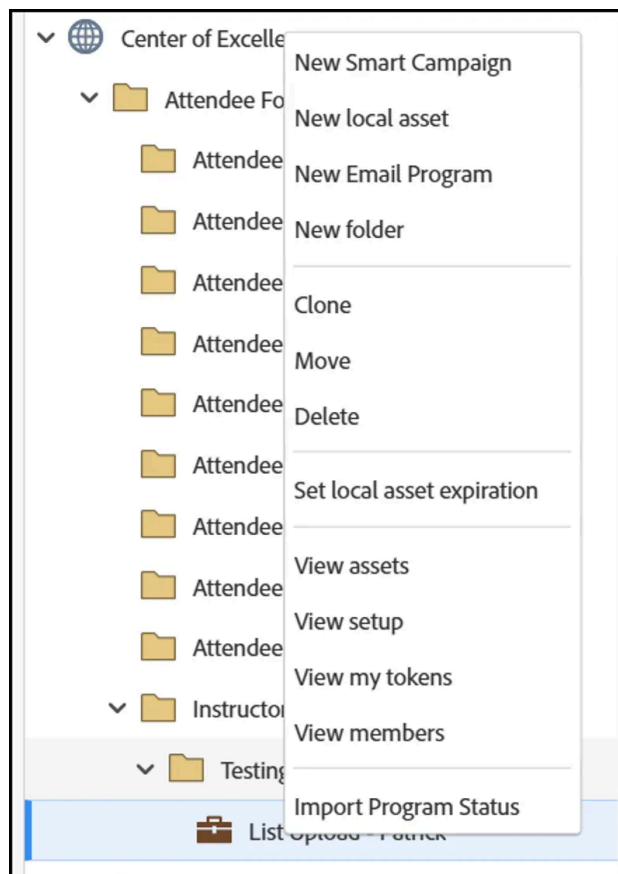

3.1.1. Data Ingestion / List Upload

Create List

1. Navigate to Marketing Activities

2. Right-click on your folder and select **"New Program"**:

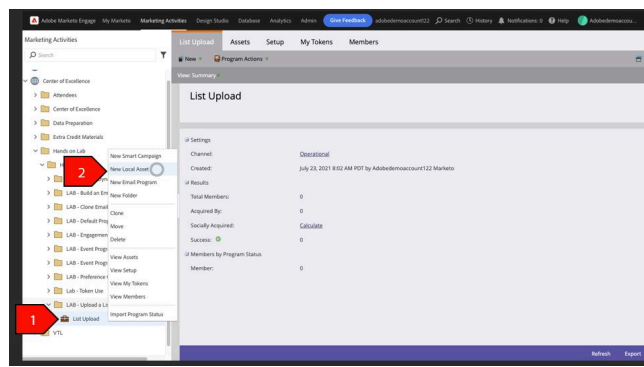

3. Type a name for your program with the format **"List Upload - Your Name"**:

The 'New Program' form is displayed with the following fields and values:

- Campaign Folder:** * Testing - Patrick
- Name:** * List Upload - Patrick
- Program Type:** * Default
- Channel:** * Email
- Program Owner:** * Patrick
- Program Owner-MK:** * Patrick
- Description:** (empty text area)

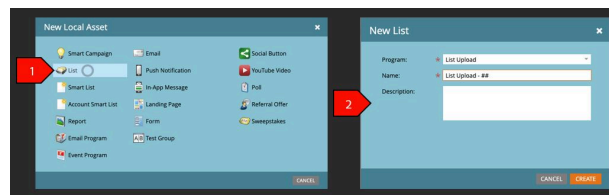

At the bottom right, there are two buttons: 'CANCEL' and 'CREATE'.

4. Right-click on your **list import** program, select **new local asset**

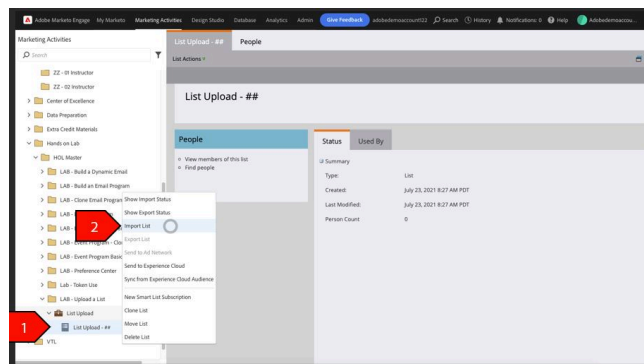

5. Click **create** after the following fields are filled out:

- Program:
- Name:

Import File to List

1. Right-click on list and select "Import List"

2. [Download your Lead file here](#)

3. Select your File, Click **Next** after completing the following below:

- Import the mkto_hol_import_list.csv file from the lab exercise
- File Format:
- List Import Mode:

4. Import Preview – Click **Next** after completing the following below:

- Ensure the List Column matches the Marketo field. All other fields can be ignored

5. Import Options – Click **Import** after completing the following below:

- List Name: MKTO HOL User ##
- Send Alert To: leave blank
- Revenue Stage: None
- Acquisition Program: None

The image displays three sequential screenshots of the 'Import List' form, numbered 1, 2, and 3, illustrating the steps to create a new list.

Step 1: Select File (Screenshot 1): This screen shows the initial setup. The 'File' field is set to 'Import_List_attachments_01.csv'. The 'File Format' is 'Auto Detect'. The 'List Import Method' is 'Default'. There are checkboxes for 'Do Duplicate people', 'Do change data value and add to list activities', and 'Delete person data'. Buttons for 'CANCEL', 'BACK', and 'NEXT' are at the bottom.

Step 2: Import Preview (Screenshot 2): This screen shows a preview of the data columns. The 'List Columns' section includes 'First Name', 'Last Name', 'Email Address', and 'Age'. The 'Sample Data' section shows example values: 'John', 'Doe', 'john.doe@example.com', and '25'. Buttons for 'CANCEL', 'BACK', and 'NEXT' are at the bottom.

Step 3: Import Options (Screenshot 3): This screen shows the final configuration options. The 'List Name' is 'MKTO HOL User ##'. The 'Send Alert To' field is empty. The 'Advanced' section is expanded, showing 'Revenue Stage' set to 'None' and 'Acquisition Program' set to 'None'. A note at the bottom states: 'Note: Revenue program is not supported. If you program is selected, Program Member Count will be ignored.' Buttons for 'CANCEL', 'BACK', and 'NEXT' are at the bottom.

3.2.2. Build an Email Program

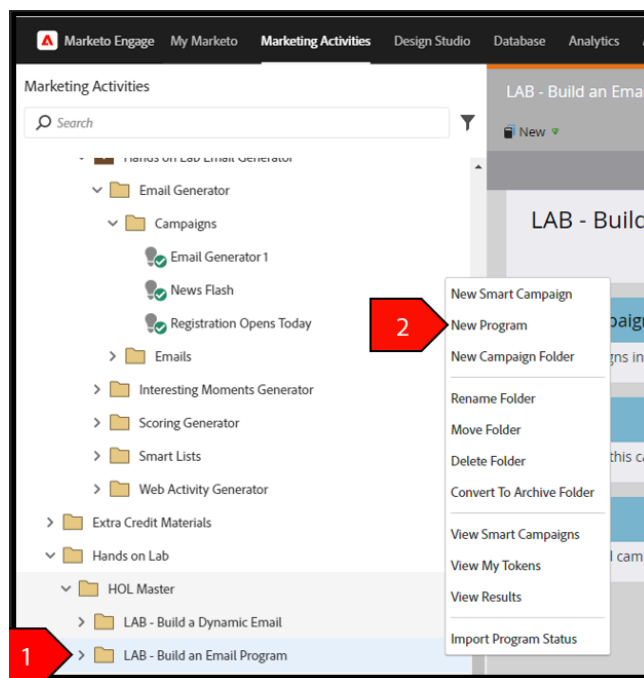

Create List

1. Navigate to **Marketing Activities**

2. Right click on your student folder, select **New Program**

3.

4. Click **Create** after the following fields have been filled out:

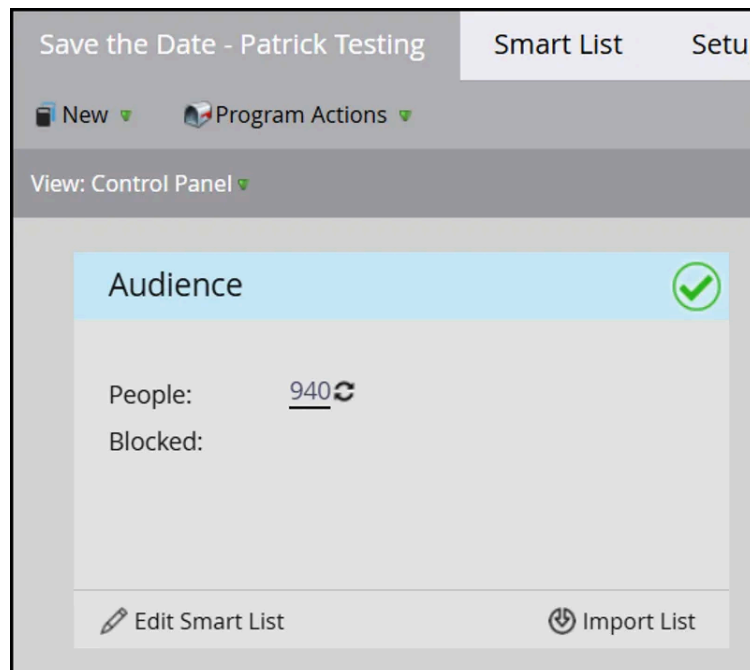

- Campaign Folder: Your Attendee Folder Name
- Name: Save The Date – Attendee ##
- Program Type: Email Channel
- Email Send Program Owner: Leave alone
- Program Owner-MK: Leave alone

- Description: Leave blank
-

5. From the Control Panel for your program, click on **Edit Smart List**:

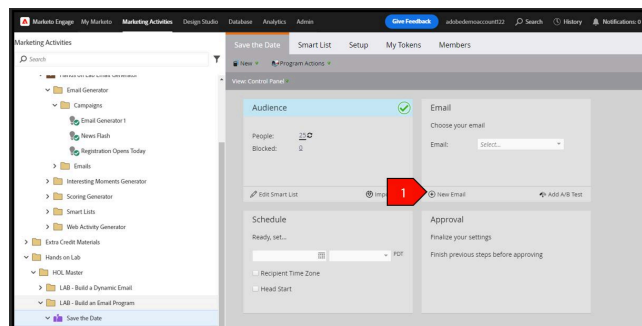

6. From the filter on the right, select "Member of List". In the open box, find your List that you created and add it:

7. Return to the Program Control Panel. Notice now your Audience has a check mark:

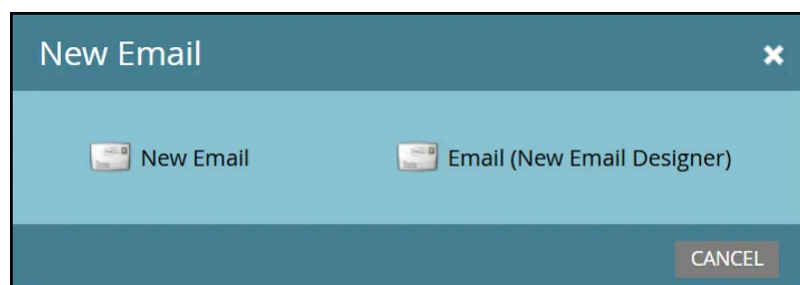

Create Email Program

1. From the Control Panel, click on **New Email**

2. Choose the "Email (New Email Designer)" when prompted:

3. In the Name, type **Save the Date - Your Name**. In the Subject Line, type **"Save the Date Event"**.

Create new email

Name *

Save the Date - Patrick

Subject line *

Save the Date Event

Personalize after creation

Cancel Create

4. On the next screen, click on the "Edit Email Content" button:

Save the Date - Patrick
email | Draft | Saved just now

6. On the left menu, notice the **Structure and Contents** for designing your email:

7. Drag the 1:1 Column onto the canvas 8 times. Your canvas should look like this now:

8. Now let's move to the Contents Section. Drag the "Image" content object to your first component block:

9. Click on Marketo Engage Assets to open the available assets. Choose the an image to add to your email. Use the Styles tab to resize the logo:
10. Add a Divider in the next component box.
11. Add a Text Content Object in the next component box. For the text we used the following: "We are an industry-leading, global general insurance organization at the forefront of originating risk solutions." Adjust the font to size 25 and center the alignment.
12. Add another Divider after your text. Your canvas should look like the following:
13. For the next components, you can choose from the options on the left. We used an image, a divider, text and a button to create the following:
14. Once you are finished with your design, click **SAVE** in the top right corner to save your email:
15. End of Lab
