# About Ivanti Tunnel

Ivanti Tunnel enables VPN capability on iOS devices. Ivanti Tunnel interacts with the Unified Endpoint Management (UEM) platform, Ivanti Standalone Sentry, and Access to secure access to enterprise resources from outside the enterprise network. The enterprise resource can be on premise or in the cloud. The UEM platforms are Ivanti EPMM and Ivanti Neurons for MDM.

## Support policy

Ivanti defines supported and compatible as follows:

| Term | Definition |
| --- | --- |
| Supported product versions | The functionality of the product and version with currently supported releases was systematically tested as part of the current release and, therefore, will be supported. |
| Compatible product versions | The functionality of the product and version with currently supported releases has not been systematically tested as part of the current release, and therefore not supported. Based on previous testing (if applicable), the product and version is expected to function with currently supported releases. |
