Revision history

Date	Revision
April 29, 2026	Updated for Ivanti Tunnel 4.20.0.
October 9, 2025	Updated for Ivanti Tunnel 4.19.0.

About Ivanti Tunnel

Ivanti Tunnel enables VPN capability on Android (native, with no containerization), Android Enterprise (containerized, previously called Android for Work), and Samsung Knox Workspace (containerized) devices.

Ivanti Tunnel interacts with the Unified Endpoint Management (UEM) platform, Standalone Sentry, and Access to allow apps and browsers on Android, Android Enterprise, and Samsung Knox devices to securely access enterprise resources from outside the enterprise network. The enterprise resource can be on-premise or in the cloud. Ivanti provides the following UEM platforms: Ivanti EPMM and Ivanti Neurons for MDM.

Support policy

Ivanti defines supported and compatible as follows:

Term	Definition
Supported product versions	The functionality of the product and version with currently supported releases was systematically tested as part of the current release and, therefore, will be supported.
Compatible product versions	The functionality of the product and version with currently supported releases has not been systematically tested as part of the current release, and therefore not supported. Based on previous testing (if applicable), the product and version is expected to function with currently supported releases.

Ivanti end of sale and support policy

See the **End of Sale and Support Policy**.
