1. Electronic Benefit Verification

Your central resource for accessing real-time pharmacy benefit and coverage information through the Surescripts network.

Electronic Benefit Verification provides:

- Coverage and benefits verification
- Patient cost and pricing transparency
- Plan and pharmacy benefit manager (PBM) details
- Information to help accelerate patient access to therapy

Documentation

[EBV API Guide](#)

Verify patient pharmacy benefit coverage, costs, and prior authorization requirements

[EBV Batch Verification Guide](#)

Verify pharmacy benefit coverage and cost information for large patient populations through a single batch request

[EBV Portal User Guide](#)

Verify patient pharmacy benefit coverage, costs, and prior authorization requirements through a secure web-based portal

How It Works (High-Level)

- Submit patient and provider information through a secure EBV request.
- Receive real-time pharmacy benefit, coverage, cost, and prior authorization information from participating PBMs.
