October 2021	Added **new features**, resolved issue **(ACP-187)** for Provisioner 1.12.0 for Android.
June 2021	Added **new features** for Provisioner 1.11.0 for Android.

3. About Ivanti Provisioner

The Ivanti Provisioner app allows administrators to easily set up Android work-managed devices (also known as "device owner mode") which are company-owned devices that may or may not have a work profile. This app allows administrators to enroll devices with QR codes.

For more resources on Ivanti Provisioner, see *Provisioner for Android documentation* section within this document.

4. New features summary

These are cumulative release notes. If a release does not appear in this section, then there were no associated new features and enhancements.

Ivanti Provisioner 1.19.0 for Android - New features summary

- **Certificate URL support for QR code generation**: The Provisioner app now allows Ivanti Go Client to specify a certificate URL using the pkiFileLocation key in the **CA Certificate Location** option when generating a QR code. The certificate URL must use the HTTP protocol.

Ivanti Provisioner 1.18.0 for Android - New features summary

- **Dynamic LEO URL support in Provisioner app**: Dynamic LEO URL attribute support is now available in the Provisioner app. This enhancement enables the LEO URL to be passed dynamically to devices in Android Open Source Project (AOSP) mode during provisioning.
- **Provision non-AOSP devices in AOSP mode**: Enhanced the Provisioner app with additional configuration options to support provisioning non-AOSP devices in Android Open Source Project (AOSP) mode. This enhancement enables direct AOSP-mode registration and provides an option to bypass Samsung license activation during enrollment.

Ivanti Provisioner 1.17.0 for Android - New features summary

- **Support to integrate Android SDK**: Android SDK version 36 is now supported with this release.

Ivanti Provisioner 1.16.0 for Android - New features summary

- **Improved user interface**: The checkbox to use the mobile data option is revised from **Allow Mobile Data Use for Provisioning** to **Use Mobile Data for provisioning**.
- **Support for custom Android Registration Source**: Administrators can define a custom Android Registration Source with up to 64 characters for Ivanti Provisioner. The new editable text field has help text **Enter a string to identify registration**. This information is visible on the **Device Details** page of Ivanti N-MDM, enabling better tracking and advanced search capabilities for streamlined device management.

Ivanti Provisioner 1.15.0 for Android - New features summary

- **NFC support**: Ivanti Provisioner will no longer support provisioning using NFC.

Ivanti Provisioner 1.14.0 for Android - New features summary

- **Enhanced support for custom attributes**: Ivanti Provisioner now supports assigning up to three custom attributes when provisioning a device using Ivanti Go or At Work EMM.

Ivanti Provisioner 1.13.0 for Android - New features summary

- **Branding updates:** The Provisioner app has been re-branded to Ivanti Provisioner.
- **Support for provisioning in offline mode:** The following option has been added to the Ivanti Provisioner app to support provisioning in offline mode:
  - Provision in Offline Mode (On Android 13+ devices only) - By default, this option is not selected. If this option is selected, the device will try to connect to the internet, but if the connection fails, the provisioning will start in offline mode if the uploaded MDM apk location is accessible offline.
- **Support for provisioning using new options:** The following options have been added to the Ivanti Provisioner app to support provisioning on Android 13+ devices:
  - Keep screen ON during provisioning - By default, this option is selected. The device screen will be ON during the entire provisioning process.
  - Allow mobile data use for provisioning - By default, this option is selected. Mobile data will be used on priority for provisioning.
- **Support Password with Ivanti Neurons for MDM in DPC extras:** Including a password as part of sending DPC extras to Ivanti Neurons for MDM is supported now. Passing passwords in setup allows administrators to have simplified deployment and is not a recommended security practice.
- **Connect to Hidden Wi-Fi network:** A new option "**Allow Connect to Hidden Wi-Fi**" has been added to the Ivanti Provisioner app. If this option is selected, the device will be able to connect to a hidden Wi-Fi network and complete the provisioning task.

Ivanti Provisioner 1.12.0 for Android - New features summary

- **Support to generate QR codes for RealWear devices:** Users are now provided an option to generate QR codes for RealWear devices.
- **Support to opt out of Auto Grant of Sensor Permissions:** Users will now have support to opt out of Auto Grant of Sensor Permissions on Android 12 devices.

Ivanti Provisioner 1.11.0 for Android - New features summary

- **Mobile@Work now available in MDMPP environments:** Mobile@Work now supports MDMPP (Work Managed) devices through the Provisioner app. For more information, see the “Installing the certified MDMPP Mobile@Work 11.2.1.0 for Android on a device" section in *Core and Android and iOS Client Mobile Device Management Protection Profile Guide 11.2.1.0*.
- **Support for Release 75 using Custom URL:** AtWork EMM is now supported under the Hosted UEM Client URL option.

5. Support and compatibility

These are cumulative release notes. If a release notes does not appear in this section, then the support and compatibility values from the nearest listed older release apply to the missing release.

Ivanti Provisioner 1.19.0 for Android - Support and compatibility

Table 2. Supported components

Product	Supported versions	Compatible versions
Android	9, 10, 11, 12, 13, 14, 15, 16, and 17	Not applicable (All listed versions are tested and supported)

Ivanti Provisioner 1.18.0 for Android - Support and compatibility

Table 3. Supported components

Product	Supported versions	Compatible versions
Android	9, 10, 11, 12, 13, 14, 15, 16, and 17	Not applicable (All listed versions are tested and supported)

Ivanti Provisioner 1.17.0 for Android - Support and compatibility

Table 4. Supported components

Product	Supported versions	Compatible versions
Android	9, 10, 11, 12, 13, 14, 15, and 16	Not applicable (All listed versions are tested and supported)

Ivanti Provisioner 1.16.0 for Android - Support and compatibility

Table 5. Supported components

Product	Supported versions	Compatible versions
Android	9, 10, 11, 12, 13, 14, and 15	Not applicable (All listed versions are tested and supported)

Ivanti Provisioner 1.15.0 for Android - Support and compatibility

The **Ivanti M@W** release build does not support pre-filling enrollment passwords from the Ivanti Provisioner.

Table 6. Supported components

Product	Supported versions	Compatible versions
Android	8, 8.1, 9, 10, 11, 12, 13, and 14	Not applicable (All listed versions are tested and supported)

Ivanti Provisioner 1.14.0 for Android - Support and compatibility

The **Ivanti M@W** release build does not support pre-filling enrollment passwords from the Ivanti Provisioner.

Table 7. Supported components

Product	Supported versions	Compatible versions
Android	8, 8.1, 9, 10, 11, 12, 13, and 14	Not applicable (All listed versions are tested and supported)

Ivanti Provisioner 1.13.0 for Android - Support and compatibility

Table 8. Supported components

Product	Supported versions	Compatible versions
Android	7, 7.1, 8, 8.1, 9, 10, 11, 12, 13	Not applicable (All listed versions are tested and supported)

Ivanti Provisioner 1.12.0 for Android - Support and compatibility

Table 9. Supported components

Product	Supported versions	Compatible versions
Android	7, 7.1, 8, 8.1, 9, 10, 11, 12	Not applicable (All listed versions are tested and supported)

Ivanti Provisioner 1.11.0 for Android - Support and compatibility

Table 10. Supported components

Product	Supported versions	Compatible versions
Android	6, 7, 7.1, 8, 8.1, 9, 10, 11	Not applicable (All listed versions are tested and supported)

Support policy

Ivanti defines supported and compatible as follows:

Table 11. Definitions for Support and Compatible

Term	Definition
Supported product versions	The functionality of the product and version with currently supported releases was systematically tested as part of the current release and, therefore, will be supported.
Compatible product versions	The functionality of the product and version with currently supported releases has not been systematically tested as part of the current release, and therefore not supported. Based on previous testing (if applicable), the product and version is expected to function with currently supported releases.

6. Resolved issues

These are cumulative release notes. If a release does not appear in this section, then there were no associated resolved issues.

Ivanti Provisioner 1.12.0 for Android - Resolved issues

- **APA-187**: Previously, the hostname and username fields must be filled to generate the QR code when CA Certificate Location is selected. This issue has been fixed.

7. Known issues

These are cumulative release notes. If a release does not appear in this section, then there were no associated known issues.

8. Limitations

These are cumulative release notes. If a release does not appear in this section, then there were no associated limitations.

9. Documentation resources

Product documentation is available on the **Ivanti documentation website**. You can directly access Ivanti Provisioner for Android documentation at **this link**.

To use the documentation:

1. Navigate to the **Ivanti documentation website**
2. Optionally, select a product category and language.
3. Enter a search term.
4. Select a product from the results.
5. Click the associated documentation links.

9.1. Ivanti Provisioner for Android documentation

The following is a complete list of documentation for this product. However, the list of documents updated for specific versions will vary, depending on release requirements. Therefore, you might encounter documents from previous releases that still apply to the current release.

- *Ivanti Provisioner Release Notes* - This is the document that you are reading now.
  Contains the following release-specific information - new features, support and compatibility, known and resolved issues, and limitations.
- ***Ivanti Neurons for MDM Administrator Guide***
  For information on setting up Provisioner, see **Setting up the Provisioner app**.
- ***Ivanti EPMM Device Management Guide***
  For information on provisioning an Android Enterprise device, see **Provisioning an Android Enterprise device**.
