

OVERVIEW

These release notes provide a list of changes to the Carbon DLS API. If you wish to use any of the new features listed below, you will need to update your programs that interact with the API.

Overview of changes:

- New features
 - GET /builds and GET /part_orders endpoints return additional information
 - Removed Experimental Endpoints

You can find API-related documentation on our GitHub repository, located at <https://github.com/carbon3d/carbon3d-api>. A shortened version of these release notes is also available via GitHub: <https://github.com/carbon3d/carbon3d-api/releases>.

If you have any questions and/or feedback, please contact support@carbon3d.com.

NEW FEATURES

GET /builds and GET /part_orders endpoints return additional information

Additional information includes:

- updated_at
- created_at

Removed Experimental Endpoints

The Experimental Endpoints section (introduced in API v0.4.4) has been removed from the public API. These endpoints will no longer be accessible. Experimental Endpoints are for internal testing purposes only and are not suitable for external use. This is expected to have no impact on customer usage.

FEEDBACK
