

OVERVIEW

These release notes provide a list of changes to the Carbon DLS API, including resolved features, coming soon, and known issues. In this release, we have added the following features:

- **API version 0.3.1 has been released**

You can find the entire process from generating an API key to testing your JWT token on our GitHub repository located at <https://github.com/carbon3d/carbon3d-api>.

The Carbon DLS API is provided as an OpenAPI spec ([api.yaml](#)). This spec allows you to generate client libraries in many languages. A list of supported OpenAPI generators is available [here](#).

If you have any questions and/or feedback, please contact api-list@carbon3d.com.

RESOLVED FEATURES

1. **Part genealogy has been removed (CLP-19195)**

Part genealogy was not used and has been removed from documentation to reduce confusion.

COMING SOON

- We are adding a new Parts and Models section to the Catalog Parts table where users will be able to view the parts and models that have been created via the API.

KNOWN ISSUES

- We are looking into an issue where *GET /printers* intermittently return a server error 500 (CLP-18979)

Please reach out to our API support group at api-list@carbon3d.com or file issues on our GitHub repository.
