

OVERVIEW

These release notes provide a list of changes to the Carbon DLS API, including resolved features, new features, and known issues. In this release, we have resolved and added following feature(s):

- **The examples for PartOrders on the Carbon DLS API GitHub repo now include Build SOP UUID**

You can find the entire process from generating an API key to testing your JWT token on our GitHub repository located at <https://github.com/carbon3d/carbon3d-api>.

The Carbon DLS API is provided as an OpenAPI spec ([api.yaml](#)). This spec allows you to generate client libraries in many languages. A list of supported OpenAPI generators is available [here](#).

If you have any questions and/or feedback, please contact api-list@carbon3d.com.

RESOLVED FEATURES

1. **Part Order statuses are now correctly updated when a packing job fails (CLP-20414)**

We have resolved an issue where the status of a failed Part Order was not updating when the packing job failed.

2. **Printers now accurately list the last and current print(s) (CLP-20532)**

We have resolved an issue where the last and current prints would inconsistently show up when using GET /printers.

NEW FEATURES

1. **The examples for PartOrders (*POST /part_orders*) on the Carbon DLS API GitHub repo now include Build SOP UUID (*build_sop_uuid*) (CLP-20566)**

We've updated our python examples Python scripts to include Build SOP UUID information when creating a Part Order.

KNOWN ISSUES

Please reach out to our API support group at api-list@carbon3d.com or file issues on our GitHub repository.
