

OVERVIEW

These release notes provide a list of changes to the Carbon DLS API, including resolved issues, new features, and coming soon. In this release, we have added the following features:

- **API version 0.0.9 has been released**
- Minor text changes on the Carbon DLS API docs page
- The “Manage API keys” page now includes “Last accessed”
- New fields have been added to Printed Parts (**GET /printed_parts**) and Builds (**GET /builds**)

You can find the entire process from generating an API key to testing your JWT token on our API repo located at <https://github.com/carbon3d/carbon3d-api>.

The Carbon DLS API is provided as an OpenAPI spec ([api.yaml](#)). This spec allows you to generate client libraries in many languages. A list of supported OpenAPI generators is available [here](#).

If you have any questions and/or feedback, please contact api-list@carbon3d.com.

RESOLVED ISSUES

1. **Parts without a model UUID would return error 500 when using *GET /builds/{uuid}* (CLP-16438)**

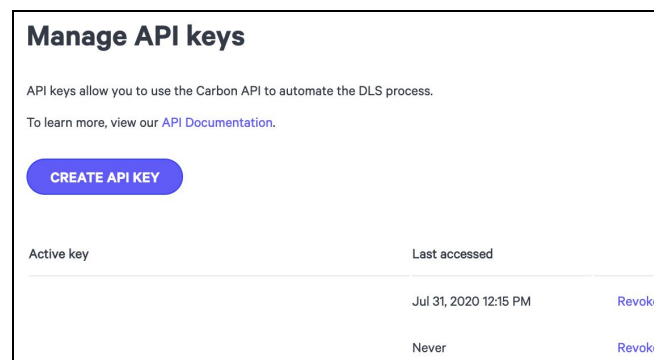

Parts without a model UUID would return error 500 when queried using its build UUID

NEW FEATURES

1. **Minor text changes on the Carbon DLS API docs page (CLP-16500)**

We’ve updated the description texts for Printers, *GET /printers/{serial}*, *GET /prints*, and Attachments (these changes are non-functional changes)

2. **Carbon’s “Manage API keys” page now includes “Last accessed” (replacing “Created at”) (CLP-16498)**

3. Additional filter params were added to Printed Parts (*GET /printed_parts*) (CLP-16043, CLP-16528)

New filter params have been added to Printed Parts including: Print Order UUID (*print_order_uuid*), Print Order Number (*print_order_number*), Build UUID (*build_uuid*), Print ID (*print_id*), UUID (*uuid*), Created At sort options (*created_at* and *created_at,desc*)

4. Additional filter params were added to Builds (*GET /builds*) (CLP-15851)

New filter params have been added to Builds including: Revision (*revision*), Status (*status*), Created Before (*created_before*), and Created After (*created_after*)

Created Before/After use the same Date-time string as the other Date-time fields such as Prints (YYYY-MM-DDTmm:hh:ss.sssZ)

KNOWN ISSUES

Please reach out to our API support group at api-list@carbon3d.com or file issues on our GitHub repo.

COMING SOON

The following will be implemented in an upcoming release:

- Ability to query Queued Prints (CLP-16041)
- Added information to Printed Parts when a part with holes has been repaired (CLP-16239)
- Ability to query by Platform NFC and Cassette NFC in Prints (CLP-16507)
